#### PROFILE

- Career Objective: I'm seeking a challenging software engineering role to use my coding skills, collaborate with teams, and grow my expertise in developing top-notch software solutions.
- Technical Proficiency: I have a strong foundation in software development principles and programming languages, enabling me to create well-designed, testable code that meets client needs and industry standards. I've worked on various projects, including web and mobile app development.
- Interpersonal and Adaptability Skills: Alongside technical skills, I possess strong teamwork and adaptability traits. I'm a quick learner with excellent attention to detail, capable of working both independently and collaboratively within diverse teams.
- Commitment to Excellence: I'm dedicated to delivering high-quality work and continuously enhancing my skills. I'm eager to contribute to a dynamic software engineering environment, gain valuable experience, and positively impact team success.

#### EMPLOYMENT HISTORY

## Self Employed

August 2019 — Present

• As a self-employed software engineer, I've completed diverse projects in web development, mobile apps, and data analytics. I handled everything from requirements to deployment and ensured smooth implementation. This experience expanded my skills in development and project management.
